GRADUATE ELECTRICAL ENGINEERS - EXPRESSION OF INTEREST

Broadcom Corporation is a major technology innovator and global leader in semiconductors for wired and wireless communications. Broadcom products enable the delivery of voice, video, data and multimedia to and throughout the home, the office and the mobile environment. We provide the industry's broadest portfolio of state-of-the-art, system-on-a-chip and software solutions to manufacturers of computing and networking equipment, digital entertainment and broadband access products, and mobile devices. These solutions support our core mission: Connecting everything®.

A FORTUNE 500® company, Broadcom is one of the world's largest fabless communications semiconductor companies with 2010 revenue of $6.82 billion, and holds over 4,800 U.S. and 2,000 foreign patents, more than 7,800 additional pending patent applications, and one of the broadest intellectual property portfolios addressing both wired and wireless transmission of voice, video and data.

Broadcom Sydney

Broadcom opened an ASIC design office in Sydney last March. We are part of a far flung design group concentrating on 802.11 ICs, covering systems level, RF and digital design and implementation in 40nm CMOS. Our chips are found in a wide range of devices - smart phones, laptops, and routers.

Position 1: DSP Engineer
Position 2: ASIC Design Engineer
Position 3: Internships - working two to three days a week while completing masters and PhD degrees

Are you an outstanding recent or current student interested in working in a demanding industrial environment, where you could make immediate use of your communications systems experience working on the interface between algorithm design and silicon implementation?

Broadcom offers the opportunity to work on world leading designs in Sydney.

Applicants must be Australian citizens or have permanent residency and hold a current drivers licence.

Applications close Friday 11 March 2011.

Interested applicants should contact:

Dr David Crosby, DSP and System Design
