**STATISTICAL SOFTWARE PROGRAMMER/RESEARCHER**

**Company:** Data Analysis & Research Technologies  
**Location:** Sydney  
**State:** NSW  
**Salary:** Competitive remuneration and flexible conditions  
**Working:** 5 days a week  
**Duration of Position:** 3 months to ongoing

**Description:**

Data Analysis & Research Technologies is looking for a student to help convert a statistical software package from Visual Studio 6 to Visual Studio 2010/2012.  
Primary responsibility will be:

- Converting modules written in C++ in the VS6 environment to VS2010 and integrating these into a new version of the software to run under windows 7/8 platforms.

**The Successful Applicants**

Essential requirements are:

- Good knowledge of C++ and Visual Studio 6/2010/2012  
- Solid understanding programming principles and ability to produce appropriate documentation  
- advanced Office / Excel, and  
- strong quantitative / analytical skills

Candidates are expected to:

- combine analytical and programming skills as well as communicate with other programmers (in the US) to produce integrated solutions  
- have an interest in statistical/mathematical models/procedures and applications.

**How To Apply:**

Please send your cover letter, resume and academic transcript to:

Email: val@ctc.usyd.edu.au  
Phone: 0412 309 967

Applicants must be able to work at home.
