

Guideline for Tutorial Assignment

ELEC5509 - Mobile Networks Semester 1, March 2009

Tutorial sessions will start in week 2 of the semester (**9 March 2009**).

Each student should attend one tutorial session per week. The mark for this assignment is 10% of your overall semester mark and it consists of two components:

- Written report
- Attendance

All students are required to prepare a report that includes the answers to the questions set for the week on the day of tutorial (as shown in the table below) and submit the report in the beginning of their tutorial session. Each report must be limited to a maximum of two A4 single-sided pages. Students are required to attend the tutorial session and to participate in the discussions. Reports without attendance won't be accepted.

Review questions are available [here](#).
